SUMMARY

Experienced front-end developer with expertise in HTML, CSS, and JavaScript. Ability to create responsive, efficient, and dynamic user interfaces for desktop and mobile. Applying for the position of Front-End Developer to join a great team for my self-development and to satisfy users.

PROJECTS

justhrow

personal project · October 2022 - November 2022

· I sketch the idea and brainstorm with my friend.

· I program the system from zero until the system functions.

· I build an app to interact with the system.

· Developed an application from concept to functioning prototype, utilizing object-oriented programming techniques, including sketching idea and brainstorming sessions, and programming the system from the ground up in accordance with project requirements. Resulted in a functioning application with interactive design.

Natural air dryer

personal project · October 2022 - November 2022

· Brainstorm with teammates on the optimum structure of the prototype.

· Construct the system from scratch and develop a system that can interactable with an app by using wifi.

· Guiding teammates to understand the system perfectly.
